SELECTED PROJECTS

Harvard Extension School — Graduate Coursework

- **Farm Visit App** — Human-centered design and AI coursework. Designed and built a clickable consumer concept for family farm visits with an AI prototyping assistant; research, product decisions, and content are my own. Live prototype: farm-visit-app.pages.dev.
- **Orbit** — Interactive prototyping coursework. Capacity-based daily planning concept (time, energy, priorities) with AI-assisted prototyping; content modeled in a Framer CMS. Live prototype: orbit-ui-concept.pages.dev.
- **NYPL Explorer** — Coded from scratch in Astro, HTML, CSS, and JavaScript (no AI assistance). A working site that pulls live data from the NYPL Digital Collections API, with a Leaflet map of pins powered by JSON data files, letting visitors explore the library's digital collections. Live site: final-project-harvard-cse12.pages.dev.

SELECTED WORK EXPERIENCE

Canada Life Insurance 2022 - 2026

User Experience Designer

- Worked with a Scrum team as a UX designer to enhance client-facing web and mobile experiences for 10+ million group customers using Figma and Jira.
- Designed wireframes for 250+ Jira tickets, contributing to the release of 3 major redesigns and net-new projects within an Agile environment.
- Analyzed 1,000+ Qualtrics responses quarterly and reviewed Adobe Analytics data to identify key themes and inform design decisions.
- Collaborated with developers and QA teams on design reviews, and with the WCAG team to ensure accessibility compliance.
- Designed and improved digital claims and benefits experiences supporting the Government of Canada's Public Service Health Care Plan transition to Canada Life, serving approximately 1.7 million federal employees, retirees, and eligible dependants.

Dialogue Technologies Inc 2022

Product Designer

- Worked concurrently with 2 Scrum teams as a product designer across 3 products, including web-based dashboards, using Figma, Jira, and Miro.
- Initiated an internal project by conducting UX research and interviews with Dialogue employees.
- Analyzed biweekly Qualtrics data and user interviews to create reports and define design criteria for the product team.
- Collaborated with the development team to ensure design specifications were implemented as intended.
- Delivered wireframes and interactive prototypes during Agile sprints, contributing to the release of 5 features to production.

Humber Galleries 2021

User Experience Designer Intern

- Created a digital artistic story for the City of Toronto's Nuit Blanche festival, exhibited in October 2022.
- Used Unity, Figma, and Blender to design an immersive artistic experience.

EDUCATION

Harvard Extension School — Master of Liberal Arts (ALM), Digital Media Design, in progress

- Fundamentals of Web Application Development
- User Experience Engineering

Nielsen Norman Group (NNG) — Interaction Design Specialization

Humber Polytechnic — Post-Graduate Certificate, User Experience Design

University of Tehran — B.A. in Foreign Languages | Post-Graduate Studies in Business Administration
